Seat Assist®

Keeps People Independent Wherever They Go

Uplift Seat Assist® is a mechanical lifting cushion that helps people stand up without assistance. Powered by a hydro-pneumatic gas spring, Seat Assist activates automatically as users begin to stand, lifting up to 80% of their weight.

TARGET CUSTOMER

- Customers who need some help getting up due to arthritis, Parkinson's, MS, ALS or other joint and neuromuscular conditions.
- Customers who have a lot of pain in the joints of their arms, legs or hips when rising, but are otherwise fairly mobile.
- People who own a lift chair but need something to take along when they go outside their home.
- Customers who have sufficient strength in their arms and/or legs to initiate the standing motion (Seat Assist provides 80% lift).

CUSTOMER BENEFITS

- Keeps people independent in and outside the home.
- Keeps people's muscles exercised.
- Can be used inside or anywhere outdoors.

BEST SEATS TO USE

- Ordinary chair
- Park bench
- Church pew
- Theater seat

MEDICARE

- HCPCS Code: E0629, Medicare Part B
- Requires Certificate of Medical Necessity (CMN) from a physician.
- Conditions include arthritis, degenerative joint and neuromuscular diseases.

Bringing quality to life.

Seat Assist[®]

FEATURES

TWO-WAY ASSISTANCE

To get up, users simply shift forward and begin to stand. The gas spring activates automatically, lifting up to 80% of their weight. The gas spring is also bi-directionally damped to ensure users are seated gently, and do not risk injury by falling into their seats.

PATENTED LevelLift™

The flexible seat curves to a flat surface that lifts users up on a level plane. This patented design provides for a safe lift up, with no forward dumping motion.

ADJUSTABLE LIFT

Weight setting grooves calibrate the strength and height of the lifting action to suit individual users weighing from 80 to 350lb (36-159 kg).

WATERPROOF

The breathable fabric cover is waterproof and machine washable in cold water. Comes in black.

EASY CARE

The memory foam cushion has a water resistant coating that can be wiped down with mild soap and water.

BUILT-IN HANDLE NON-SKID BOTTOM

The base has a built-in handle and a non-slip material covering that prevents the cushion from shifting on fabric seating surfaces.

MEMORY FOAM CUSHION

Slow release memory foam provides additional comfort and prevention against pressure sores.
