

AQUATEC[®] The BELUGA RSB

Imagine yourself or your loved one enjoying waves of bubbles in your tub. With the **BelugaRSB** this is now a reality. **BelugaRSB** has adjustable back laterals to provide a stable support for a safe and pleasurable bath experience. The back support reclines to 35°. Battery operated; simple home installation, **BelugaRSB** is perfect even for traveling.

BELUGA RSB WIDE

BELUGA RSB

Features

- Battery power for portability and easy installation
- Use with or without covers
- Lifts 300 pounds
- Lowers to 2.5" from bottom of tub
- Available in wide model
- Accessories offer seating and positioning options

Operation

For a safe and comfortable bath, simply sit on the seat platform, rotate your legs in to the tub, and adjust the side laterals for back support. To lower, push the down button on the hand control and **BelugaRSB** will lower you into the tub. Once at the bottom, if you continue to hold the button, the back will recline to a 35° angle. To raise the seat, push the up button on the hand control and the back will come to the upright position and then the lift will rise. The adjustable side flaps on the back support are easily positioned by lifting the flaps and letting the flap reset in the hinge. The reclining back will separate from the base for ease when cleaning or traveling.

The **BelugaRSB** comes with a 12v gel battery and charger. The battery will give multiple cycles and the lift has a built-in safety feature that will not allow the lift to lower if there is not enough battery charge to raise it again. A red light will glow on the hand control to tell you that the battery is low or out of charge. Recharging the battery after each use will give the optimum battery life.

BelugaRSB fits standard size tubs that do not exceed 26" across the top opening or 16" deep. **BelugaRSB Wide** will fit tubs that are up to 33" across the top opening. Height adapters allow either size **Beluga** to fit a tub as deep as 19".

BELUGA RSB

AQUATEC[®] The BELUGA RSB Accessories

Components

Beluga seat, back and lifting scissors are made with fiber reinforced plastic. Covers for seat and back are made from blown PVC, are machine washable and latex free. The unique hinge decreases the possibility of pinching, allowing you to sit directly on the non-slip patterned surface without the covers. Four suction cups hold the lift securely on the tub floor (*will not adhere safely to textured floor surfaces*). The floating hand control operates the lift and has a low-battery indicator. Battery and charger are included.

Accessories

- Head Support
- Rotary seat with transfer board
- Height Adapters
- Seat or chest belt
- Sand filled wedge cushion
- Abductor
- Carry bag
